Finding X and Y intercepts

X intercept -

Y intercept -

- To find the x-intercept, let $y = 0$ and solve for x.
- To find the y-intercept, let $x = 0$ and solve for y.

N.Y.T.

Use intercepts to graph the equation $3x + 4y = 12$.

Use intercepts to graph the linear equation. Label the points corresponding to the intercepts.

3. $2x - y = 4$

4. $x + 3y = -9$
